

SP MARINE SERVICES STRENGTHENS LOGISTICS CAPABILITY WITH FLEET UPGRADE

KOTA KINABALU, 8 August, SP Marine Services Sdn Bhd, a subsidiary of Sabah Ports Sdn Bhd, has enhanced its bulk liquid transport capabilities with the acquisition of Malaysia's first Scania Euro V truck for Bulk ADR Transport equipped with Advanced Driver Assistance System (ADAS).

The addition of the new vehicle marks a significant step in improving operational reliability, transport safety, and service efficiency for the company's marine and offshore support activities. The Euro V's ADAS system assists drivers with advanced safety alerts and stabilisation controls, enabling more consistent journey times and reducing the likelihood of operational disruptions.

"This investment directly supports our commitment to delivering safe, timely, and dependable services to our customers," said Datuk Ng Kiat Min, Group Managing Director of Sabah Ports Sdn Bhd. "By modernising our transport assets, we can optimise scheduling, improve load handling, and enhance overall fleet performance."

With the new vehicle, SP Marine Services can handle specialised bulk cargo under ADR standards with greater efficiency, reducing turnaround times and enabling more predictable service windows for customers. The improved engine efficiency and maintenance support framework will also contribute to lower lifecycle costs and more sustainable operations.

Datuk Ng added, "This upgrade reflects our focus on operational excellence. Our goal is to ensure that every aspect of our logistics chain, from port handling to final delivery, meets the highest standards of safety, reliability, and efficiency."

SP Marine Services will integrate the vehicle into its current fleet management system, enabling real-time monitoring of performance and route optimisation. This will support data-driven decisions that further strengthen service delivery and resource planning.
